

MICAH KESIENA

FULL-STACK DEVELOPER • PENETRATION TESTER

micahkesiena@gmail.com | 0901 548 2365 | github.com/DevTechMike-Coder | micahkesiena.vercel.app

PROFESSIONAL SUMMARY

Security-focused Full-Stack Developer and ethical penetration tester specializing in engineering secure, production-grade web and mobile applications. Expert in building with **Next.js, React Native, Prisma, and Supabase** while proactively applying security-by-design principles (including IDOR-safe server actions, OAuth/PKCE flows, and hardened session management). Adept across the entire software development lifecycle, from system architecture and high-fidelity UX animations to rigorous vulnerability assessments.

TECHNICAL SKILLS

Frontend & Mobile:	Next.js (App Router), React Native (Expo), TypeScript, Tailwind CSS, GSAP, Framer Motion, dnd-kit
Backend & Databases:	Prisma, Drizzle ORM, Supabase, Hono, BullMQ, PostgreSQL
Security & DevSecOps:	OAuth 2.0 / PKCE, IDOR mitigation, Edge runtime authentication (jose), session hardening, Kali Linux, vulnerability assessments, OWASP Top 10
Tooling & DevOps:	Git (Advanced branching/forking), Docker, WSL2, Vercel, CI/CD pipelines

KEY PROJECTS

Vertex Canvas	Full-Stack Project Management Platform
vertexcanvas.vercel.app	
Architected & Developed: Engineered a collaborative, full-stack Kanban and project management application utilizing Next.js, Prisma, and Supabase, featuring dynamic workflow states, role-based access control (RBAC), and real-time updates. Hardened Security: Conducted a comprehensive, self-directed security audit; patched critical IDOR vulnerabilities, refactored middleware authorization rules, and secured Edge runtime session handling using jose. User Experience: Integrated secure social authentication (Google/GitHub OAuth via PKCE), designed an interactive team activity feed, and crafted a polished, responsive sidebar navigation system.	

Next Hub Ecommerce	Secure E-Commerce Infrastructure
ecommerce-three-omega-39.vercel.app	
Engineered Core Flows: Developed a high-performance e-commerce platform with robust authentication powered by better-auth, including fully realized admin controls for managing orders, customers, and inventory. Secured Workflows: Built tamper-proof forgot/reset password flows featuring secure token lifecycle handling and a modular architecture prepared for seamless third-party email provider integrations. Polished UX: Focused heavily on performance and micro-interactions, building custom, reusable components animated with Framer Motion for a premium native feel.	

EDUCATION

[Institution Name] — [Degree / Program]	[Start Year] – [End Year]
---	---------------------------

ADDITIONAL EXPERIENCE

- **Open Source Contributor:** Active contributor to core ecosystem libraries including **supabase/auth-js**, Prisma, Drizzle, BullMQ, and Hono.
- **Technical Writing & Community:** Document and share technical insights through a "build-in-public" methodology, publishing deep-dives on application security, database performance, and modern full-stack development.
